

BWS

Euro Snap Cylinder

INCREASES SECURITY

Break-ins involving doors with Euro profile cylinders are on the increase in both domestic and commercial premises.

The Euro Snap Cylinder is designed to snap at the designated cut, instead of at the locking position.

This makes an attack more difficult, but always allows keyholders to open the door.

YOUR LOCAL STOCKIST

BWS SNAP CYLINDERS

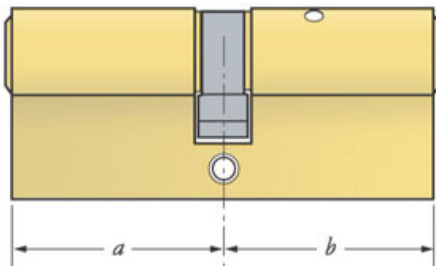

Measuring your cylinder for replacement

Measurement A - Measure from one end of the cylinder to the middle of the central screw hole (e.g. 40mm).

Measurement B - Measure from the other end to the middle of the central screw hole (e.g. 45mm).

This would be a 40/45 cylinder (85mm in length). No further measurements are required.

Please note if it has a key one side and turn on other side, note the side the thumb turn is on example 40/30T

Stock Item	Description
	SATIN NICKLE DOUBLE EURO CYLINDER STD SIZES
SNAP3030-N	BWS SNAP 60MM DBL. EURO SC
SNAP3535-N	BWS SNAP 70MM DBL. EURO SC
