

# Exidor 700 Series

## CONSTRUCTION

The main body and slave units are constructed from a mixture of steel and stainless steel. The internal components are manufactured from steel and the shoot ends are of solid steel with tubular steel rods.

## FINISH

The 700 series is available in grey (RAL 7016), nickel plated stainless steel effect and solid stainless steel. The plated finish is not recommended for external use or outside access devices.

## FIXINGS

Surface mounted with full instructions and templates supplied with each unit.

## STANDARDS

Standard units are suitable for doors up to 2440mm high and 1210mm wide. Special sizes are available on request for doors outside this scope.

During severe attacking from the outside the bolts still hold the door secure.

Continual attacking has jammed the mechanism but kept the door secure and stopped entry from the outside.

## CROSS BAR UNITS

EN1125 : 2008  
Classification No.  
3 7 6 0 1 3 2 1 A A

## LEVER HANDLE UNITS

EN179 : 2008  
Classification No.  
3 7 6 0 1 3 5 1 A A/D

The Exidor heavy duty range contains products for applications where a greater degree of security and durability is required. Products within the range have been used on security doors and approved to LPS1175 Level 2 (burglary resistance test).

## CROSS BAR UNITS FOR PANIC EXIT SITUATIONS

- CE marked for safety
- Non-handed

# Heavy Duty Security System

## 2 Point & 3 Point Cross Bar Units:

- **702B/30S** Two point push bar unit with 30mm bolt throw for steel doors
- **702B/30T** Two point push bar unit with 30mm bolt throw for timber doors
- **703B/30S** Three point push bar unit with 30mm bolt throw for steel doors
- **703B/30T** Three point push bar unit with 30mm bolt throw for timber doors

## 4 Point Cross Bar Units:

- **704B/30S** Four point push bar unit with 30mm bolt throw for steel doors
- **704B/30T** Four point push bar unit with 30mm bolt throw for timber doors

## Lever Handle Devices:

- **702L/30S** Two point lever unit with 30mm bolt throw for steel doors
- **703L/30S** Three point lever unit with 30mm bolt throw for steel doors
- **704L/30S** Four point lever unit with 30mm bolt throw for steel doors
- **732L/30S** Two point lever unit with 30mm bolt throw inward opening for steel doors
- **733L/30S** Three point lever unit with 30mm bolt throw inward opening for steel doors

## Outside Access Devices:

- **709EC** Outside access device with knob and Euro profile cylinder
- **709EA** Outside access device with knob and Euro profile aperture
- **710EC** Outside access device with lever and Euro profile cylinder
- **710EA** Outside access device with lever and Euro profile aperture

## Multi-Point Bolts:

- **712L/30S** Two point multi-point bolt unit with 30mm bolt throw for steel doors
- **713L/30S** Three point multi-point bolt unit with 30mm bolt throw for steel doors
- **714L/30S** Four point multi-point bolt unit with 30mm bolt throw for steel doors

## Locking Boxes:

- **705EC/LH** Locking box with Euro cylinder - left handed
- **705EC/RH** Locking box with Euro cylinder - right handed
- **705DEC/LH** Automatic deadlocking box with an offset Euro profile thumbturn cylinder - left handed
- **705DEC/RH** Automatic deadlocking box with an offset Euro profile thumbturn cylinder - right handed

**Heavy Duty Tower Bolt:**  
HS923/10 254mm long
